

PROFILE

Computer Science student at the University of Southern Mindanao with hands-on experience building database-backed web applications, API services, role-based workflows, and AI/computer vision prototypes. Comfortable turning academic or office workflows into maintainable systems with documentation, reports, and presentation-ready outputs.

EXPERIENCE

Cybersecurity Researcher & Web Developer

University Information Communication Technology Office (UICTO)

Jun 2026 - Present

- Conduct authorized vulnerability research and support secure university web systems.
- Develop internal tools with attention to access control, documentation, and maintainability.

On-the-job Training Developer

INFOSOFT, Matina, Davao City

Jun 2025 - Aug 2025

- Worked on full-stack development tasks including database schema work, backend APIs, debugging, and responsive interface styling.

SELECTED PROJECT EXPERIENCE

Cheen Tea Kiosk and API

Next.js, Laravel, Sanctum, Reverb

- Built kiosk ordering, cashier, kitchen display, admin dashboard, loyalty, product, order queue, and reporting workflows.

USM Agapay Service Desk

Laravel, Vue 3, Pinia, SQL Server

- Modeled ticket submission, office services, staff queues, claims, transfers, comments, attachments, notifications, and audit logs.

ClassVision: YOWOV2 Student Activity Detection

Python, YOWOV2, CVAT, PyTorch

- Prepared classroom CCTV datasets with 108,116 label files and 1.95M boxes; documented a privacy-conscious activity detection workflow.

Gym Face Management / RAK Fitness

Django, FastAPI, React, InsightFace

- Built member registration, billing, payments, attendance, reports, and local face-recognition check-in with manual fallback.

USMctf Platform and Pentest Workspace

Next.js, Laravel, FastAPI, OWASP

- Created CTF platform services and organized an authorized, non-destructive security research workspace with reporting handoffs.

EDUCATION

BS in Computer Science

University of Southern Mindanao

2022 - Present

Thesis: YOWOV2-Based Student Activity Detection Framework

Senior High School

Notre Dame of Kabacan Inc.

2020 - 2022

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, C#

Frontend: React, Next.js, Vue 3, Vite, Tailwind CSS

Backend: Laravel 12, FastAPI, Django, ASP.NET Core, REST APIs

Data/DevOps: PostgreSQL, SQL Server, SQLite, Redis, Docker Compose, MinIO/S3

Security: RBAC, JWT, CSRF, bcrypt, AES-GCM, Burp Suite, Ghidra, OWASP

AI/CV: YOWOV2, InsightFace, PyTorch, CVAT, dataset validation

STRENGTHS

System building: Turns real workflows into usable web applications and APIs.

Documentation: Prepares setup notes, reports, figures, and presentation materials.

Security mindset: Uses authorization boundaries, audit logs, and non-destructive testing practices.

LEADERSHIP

Socio-Cultural & Sports Chairperson

University of Southern Mindanao

2025 - 2026

External Officer

PSITS

2024 - 2025
