

Russel Jhon C. Buisan

Full Stack Developer | Python, FastAPI, React, Next.js, Laravel, REST APIs

Pikit, Cotabato, Philippines | rjcbuisan@usm.edu.ph | +63 920 633 1342 | GitHub: De1m0z | Portfolio: de1m0z.github.io

SUMMARY

BS Computer Science graduate with project experience in Python/FastAPI, Django, React, Next.js, Vue, Laravel, REST APIs, SQL databases, Docker, role-based access, reporting dashboards, and computer vision research. Built ordering, service desk, scheduling, face attendance, CTF, and student activity detection systems from real workflow requirements.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, PHP, C#, SQL
Backend: FastAPI, Django, Laravel, ASP.NET Core, REST APIs, Sanctum, JWT, WebSockets, Reverb
Frontend: React, Next.js, Vue 3, Vite, Tailwind CSS, responsive UI development
Data and Infrastructure: PostgreSQL, MySQL, SQL Server, SQLite, Redis, Docker Compose, MinIO/S3
Security and QA: RBAC, CSRF protection, bcrypt, AES-GCM, audit logs, OWASP, Burp Suite, Ghidra
AI and Computer Vision: PyTorch, YOWOV2, InsightFace, CVAT, dataset cleaning and validation

EXPERIENCE

Cybersecurity Researcher and Web Developer, University Information Communication Technology Office May - June 2026

- Reviewed university web systems during authorized security research and documented findings for technical handoff.
- Built internal web tools with role-based access, authentication checks, audit trails, setup notes, and maintainable code structure.

On-the-job Training Developer, INFOSOFT, Matina, Davao City Jun 2025 - Aug 2025

- Supported full-stack development tasks across database schema work, backend APIs, UI fixes, debugging, and responsive styling.
- Worked with team feedback, issue tracking, code review notes, and deployment preparation for business application features.

PROJECTS

Cheen Tea Kiosk and API Next.js, Laravel Sanctum, Reverb, MySQL, cashier and kitchen workflows, admin reporting

- Built kiosk ordering, cashier, kitchen display, admin dashboard, loyalty, product, order queue, and sales reporting features.

USM Agapay Service Desk Laravel, Vue 3 Pinia, SQL Server, RBAC, notifications, attachments, audit logs

- Developed ticket submission, office services, staff queues, claims, transfers, comments, files, notifications, and audit tracking.

RAK Fitness / Gym Face Management Django, FastAPI, React InsightFace, member records, billing, attendance, reporting

- Built member registration, payments, billing, attendance reports, and local face-recognition check-in with manual fallback.

ClassVision Thesis: YOWOV2 Student Activity Detection Python, PyTorch YOWOV2, CVAT, dataset validation, computer vision research

- Prepared classroom CCTV datasets with 108,116 label files and 1.95M boxes; documented training and evaluation workflow.

USMctf Platform Next.js, Laravel, FastAPI CTF website, authentication, challenge service, scoring, admin tools, Docker, PostgreSQL, Redis

- Built a large capture-the-flag web platform with user management, challenge delivery, real-time scoring, admin workflows, API services, and security-focused deployment structure.

Thesis Defense Scheduler FastAPI, React, PostgreSQL Role-based scheduling, approvals, faculty availability, PDF records, audit logs

- Designed scheduling, panel assignment, approval tracking, and document-generation workflows for academic thesis defense coordination.

EDUCATION

BS in Computer Science, University of Southern Mindanao 2022 - 2026
Latin Honor: Cum Laude | Thesis: YOWOV2-Based Student Activity Detection Framework

LEADERSHIP

Socio-Cultural and Sports Chairperson, University of Southern Mindanao, 2025 - 2026 | External Officer, PSITS, 2024 - 2025
