

Russel Jhon C. Buisan

Full-Stack Developer | Node.js, React, Python, FastAPI, Laravel

Pikit, Cotabato, Philippines | oslecubisan613@gmail.com | +63 920 633 1342 | GitHub: De1m0z | Portfolio: de1m0z.github.io

SUMMARY

BS Computer Science graduate, Cum Laude, building secure web applications, reporting platforms, and computer vision tools. Sole developer of HammerPulse, an account-scoped Meta advertising analytics platform.

TECHNICAL SKILLS

- Languages:** Python, TypeScript, JavaScript, PHP, C#, SQL
- Backend:** Node.js, Fastify, FastAPI, Django, Laravel, ASP.NET Core, REST APIs, JWT, WebSockets
- Frontend:** React, Next.js, Vue 3, Vite, Tailwind CSS, responsive UI development
- Data and Infrastructure:** PostgreSQL, MySQL, SQL Server, SQLite, Redis, Docker Compose, MinIO/S3
- Security and QA:** RBAC, CSRF protection, bcrypt, AES-GCM, audit logs, OWASP, Burp Suite, Ghidra
- AI and Computer Vision:** PyTorch, YOWOV2, InsightFace, CVAT, dataset validation, account-scoped assistants

EXPERIENCE

Cybersecurity Researcher and Web Developer, University Information Communication Technology Office May - June 2026

- Conducted authorized security research on university systems and documented findings for technical handoff.
- Built internal web tools with role-based access, authentication, audit trails, and setup documentation.

On-the-job Training Developer, INFOSOFT, Matina, Davao City Jun 2025 - Aug 2025

- Supported database design, backend APIs, interface fixes, debugging, and responsive layouts.
- Worked with team feedback, issue tracking, code review, and deployment preparation.

PROJECTS

HammerPulse Sole developer

Node.js, Fastify, React, TypeScript, PostgreSQL, Redis, Docker. Built Meta data ingestion, validated reporting, account-scoped workspaces, client reports, and a read-only assistant.

ClassVision: Student Activity Detection Python, PyTorch

YOWOV2, CVAT, computer vision research. Prepared 108,116 label files and 1.95M boxes with by-video splits; documented training, evaluation, and privacy boundaries.

USMctf Platform Next.js, Laravel, FastAPI

PostgreSQL, Redis, Docker Compose. Built authentication, challenge delivery, scoring, and admin tools across a documented multi-service platform.

Cheen Tea Kiosk and API Next.js, Laravel

Sanctum, Reverb, MySQL. Built customer ordering, cashier and kitchen queues, loyalty rewards, product management, and sales reporting.

USM Agapay Service Desk Laravel, Vue 3

Pinia, SQL Server, RBAC. Developed service requests, office routing, staff queues, transfers, attachments, notifications, and audit tracking.

RAK Fitness / Gym Face Management Django, FastAPI, React

InsightFace, member records, billing. Built membership, payments, attendance reports, and local face check-in with consent checks and manual fallback.

Thesis Defense Scheduler FastAPI, React, PostgreSQL

Role-based scheduling, encrypted files, audit logs. Built defense booking, faculty availability, panel approvals, signatures, and generated PDF records.

EDUCATION

BS in Computer Science, University of Southern Mindanao 2022 - 2026

Latin Honor: Cum Laude | Thesis: YOWOV2-Based Student Activity Detection Framework

LEADERSHIP

Socio-Cultural and Sports Chairperson, University of Southern Mindanao, 2025 - 2026 | External Officer, PSITS, 2024 - 2025
